PERSONAL PROJECTS

News API App

- This app follows clean code and MVVM architecture.
- It is an app that fetches news from the newsapi.org API and displays news to the user. We can search for a piece of particular news or saves a piece of news on our device.

Spectacle

- This app displays popular TV shows, movies, and actors to the user.
- It uses tmdb service API to get results and follow MVVM architecture.

Social App

- This app uses firebase authentication and a real-time database.
- We can post different types of posts and like the posts.

Work Out App

- This is a 7 Minute workout application that contains 12 exercises 30 seconds each for fitness. You can check your BMI
- You can also check your previous exercises log/history. It also read the exercise for blind people.
